Harvest Tools

§112.121 Harvest

Harvest Tools

Tools used for harvesting should be cleaned periodically.

When not in use, tools should be stored in a designated area where they can not be contaminated.

Don't use harvest containers as trash bins.

Harvest tools should be accounted for at the end of each shift. Tools may be identified to aid in accounting for them at the end of the shift.

A cleaning and maintenance schedule should be developed for tools and equipment.

Tools with cracks or scratches can make cleaning difficult and may need to be replaces.

Tools dedicated for contacting soil or feces removal should be stored away from tools than can contact produce.

When used in the field, tools should not be held in personal pockets, set on the ground, or carried in a personal vehicle.

When not in use, harvest tools should be stored in a clean bin or in an area to prevent them from being contaminated.
